# Privileged Access Management (PAM)

Redefining Your PAM Program

István Molnár

System engineer

[istvan.molnar@clico.hu](mailto:istvan.molnar@clico.hu)

# Motivations for Identity Security

# New Environments Create New Attack Methods

Compromised identities and credentials remain a constant target in cyber attacks.

## Malicious Actors

## Identities

## Enterprise Resources

Lateral & Vertical Movement

## Actions on Objectives

Execute Endgame

Credential Theft

Privilege Escalation & Abuse

# Understanding the Attack Chain

How do we defend against this attack path?

## Identity Compromise (Credential theft)

- Single Sign-On
- Passwordless Authentication
- Adaptive Multifactor Authentication
- Session-less Cookies
- Browser Cookie Protection
- Credential Store Protection
- Complex Passwords/Secrets
- Password/Secret Vaulting
- Password/Secret Rotation
- Credential & Session Isolation
- Removal of Hard-Coded Credentials

## Lateral and Vertical Movement

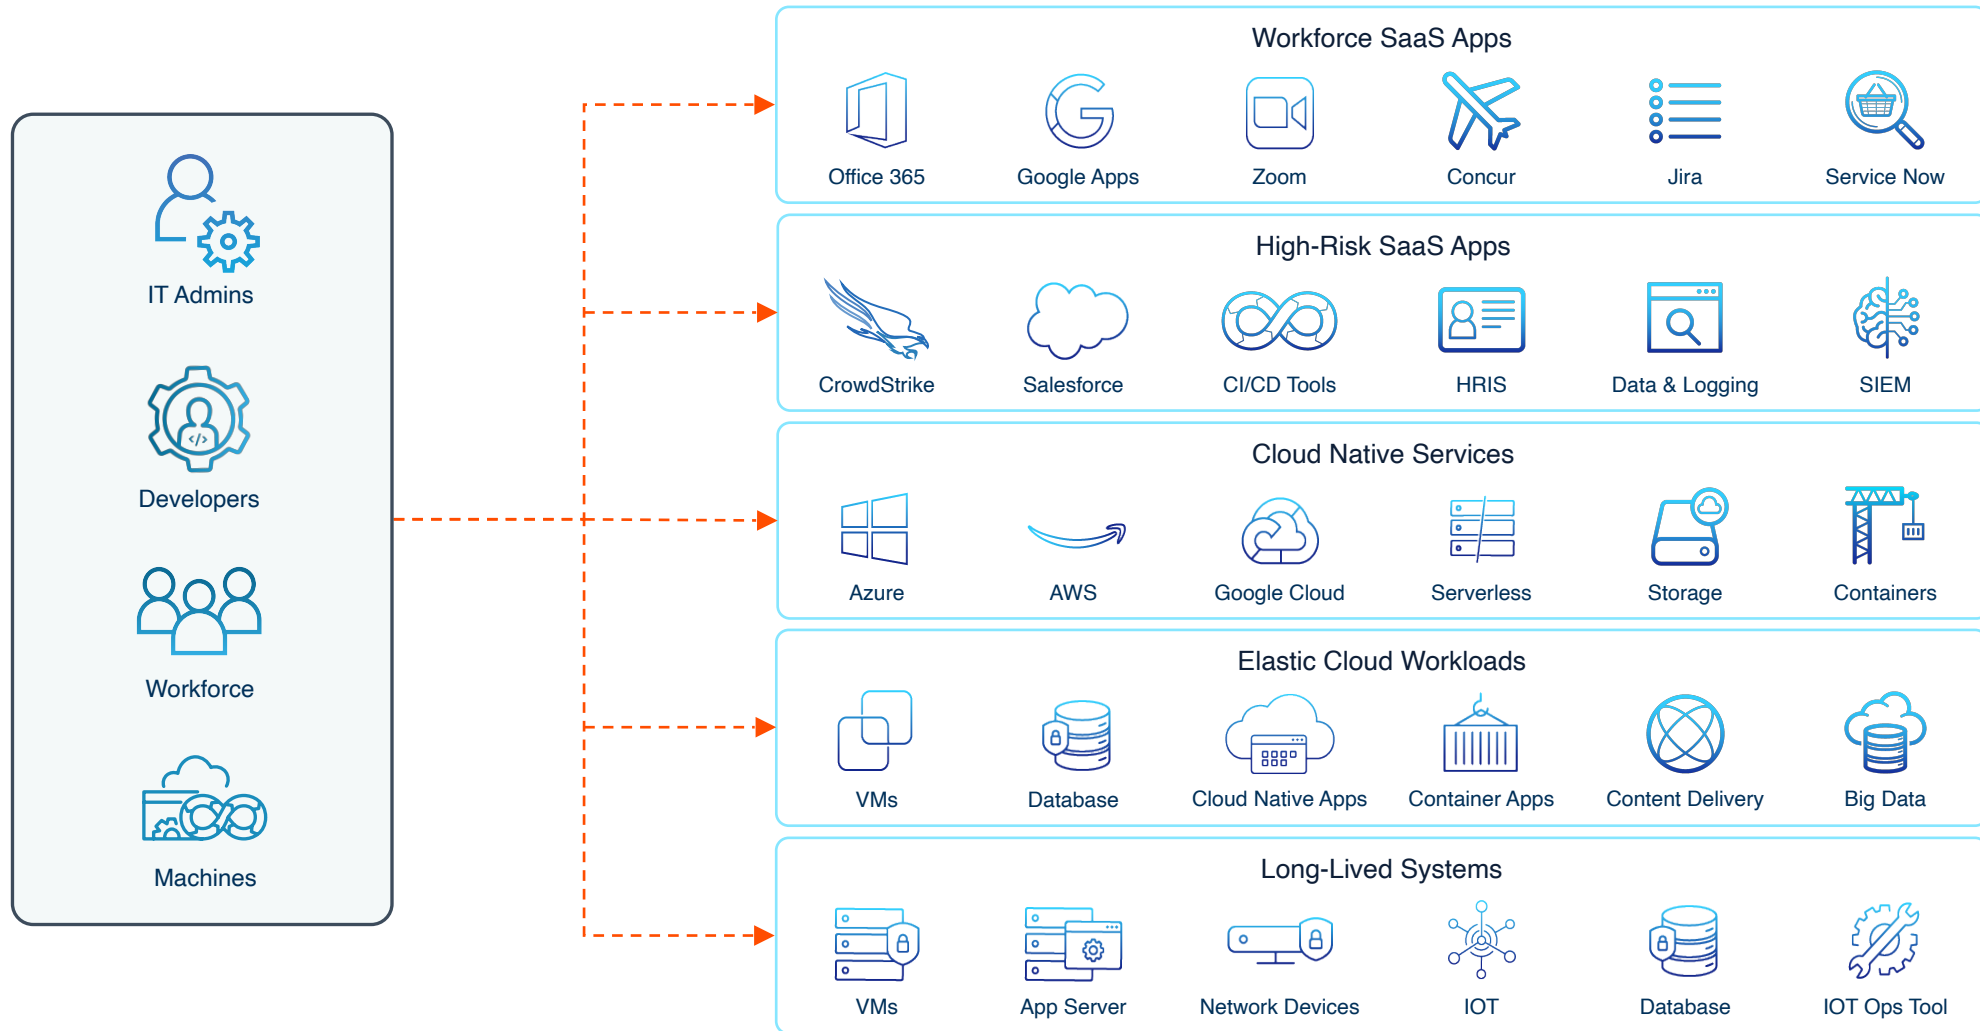

- Zero Standing Privilege
- Just-In-Time Access
- Role-Based Access Control
- Limit Scope of Influence (Blast Radius)
- Randomize/Unique Local Credentials
- Session Protection
- Session Isolation
- Session Monitoring & Analytics
- Identity Threat Detection & Response
- Application Control

## Privilege Escalation and Abuse

- Continuous Authentication
- Time-Bound Access
- Session Monitoring & Analytics
- Audit Logging & Session Recording
- Identity Threat Detection & Response
- Privilege Analysis
- Least Privilege Enforcement
- Lifecycle Management
- Compliance Campaigns
- Application Control

# Today's Identities and Environments

New identities, new environments, new attack methods

Day of Week

Geo Velocity

Account

Add an Extra Layer of Protection  
before granting access to corporate applications

## MFA EVERYWHERE

Protect a broad range of  
use cases and resources

## AUTHENTICATION METHOD SUPPORT

Broadest choice of authentication  
factors, including a variety of  
Passwordless factors.

## RISK-AWARE

Leverage machine learning for  
behavior-based MFA

## STANDARDS BASED

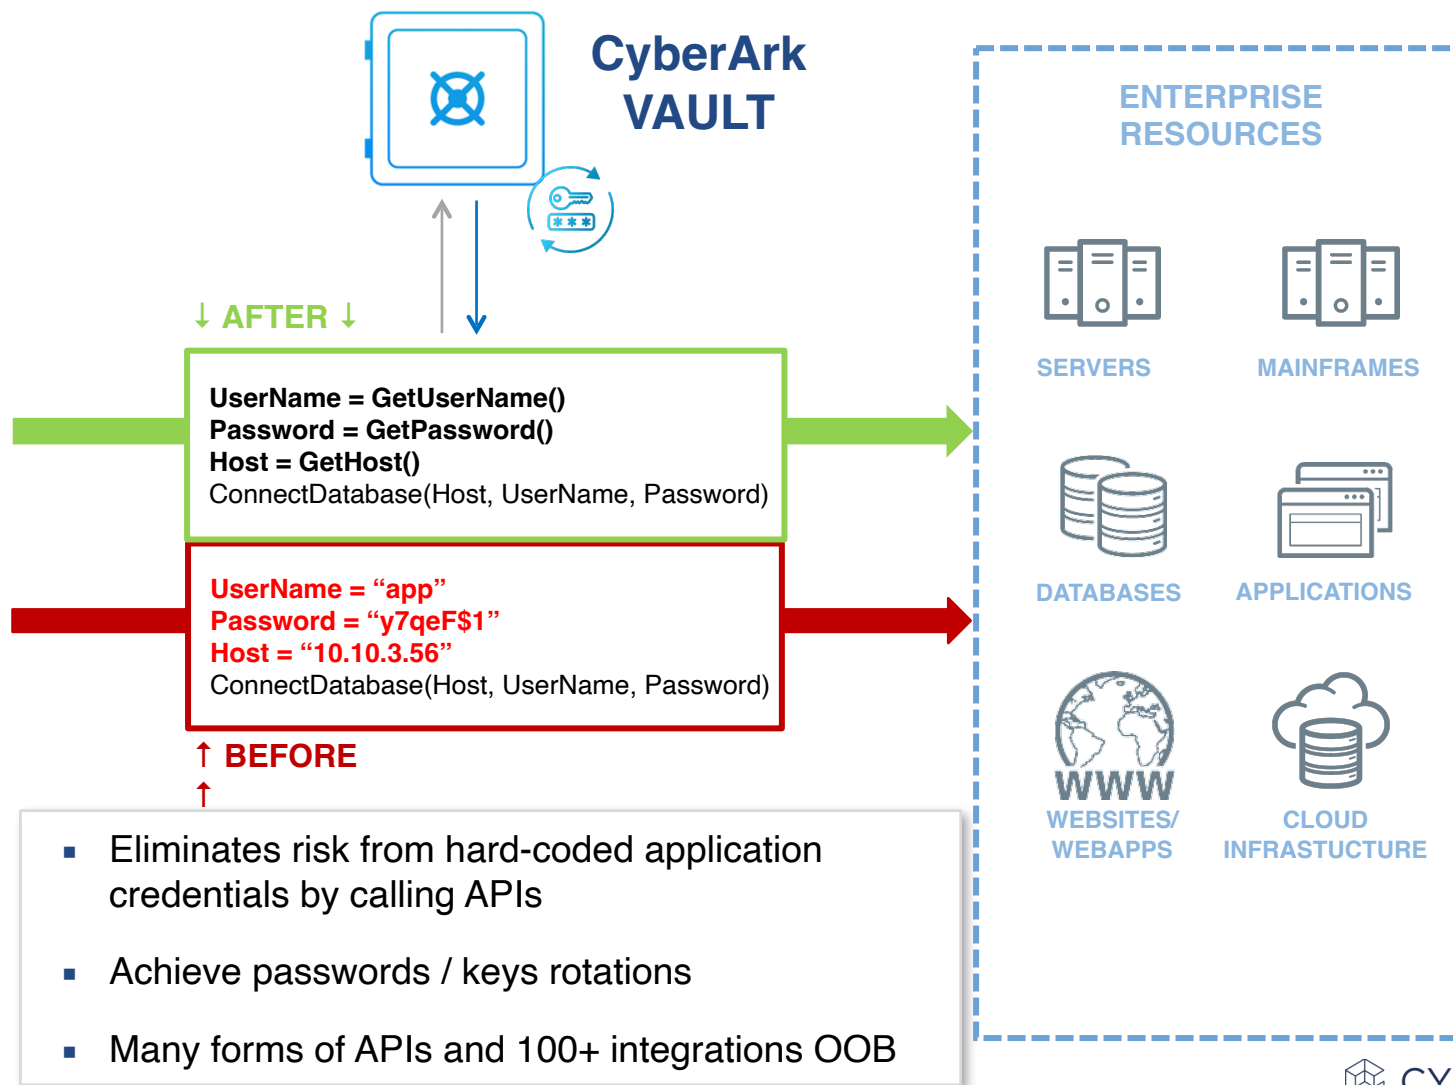

Architected for using OATH, FIDO,  
and RADIUS standards for out of box  
integrations

# CyberArk Secrets Manager

Remove hard coded credentials and start rotate them

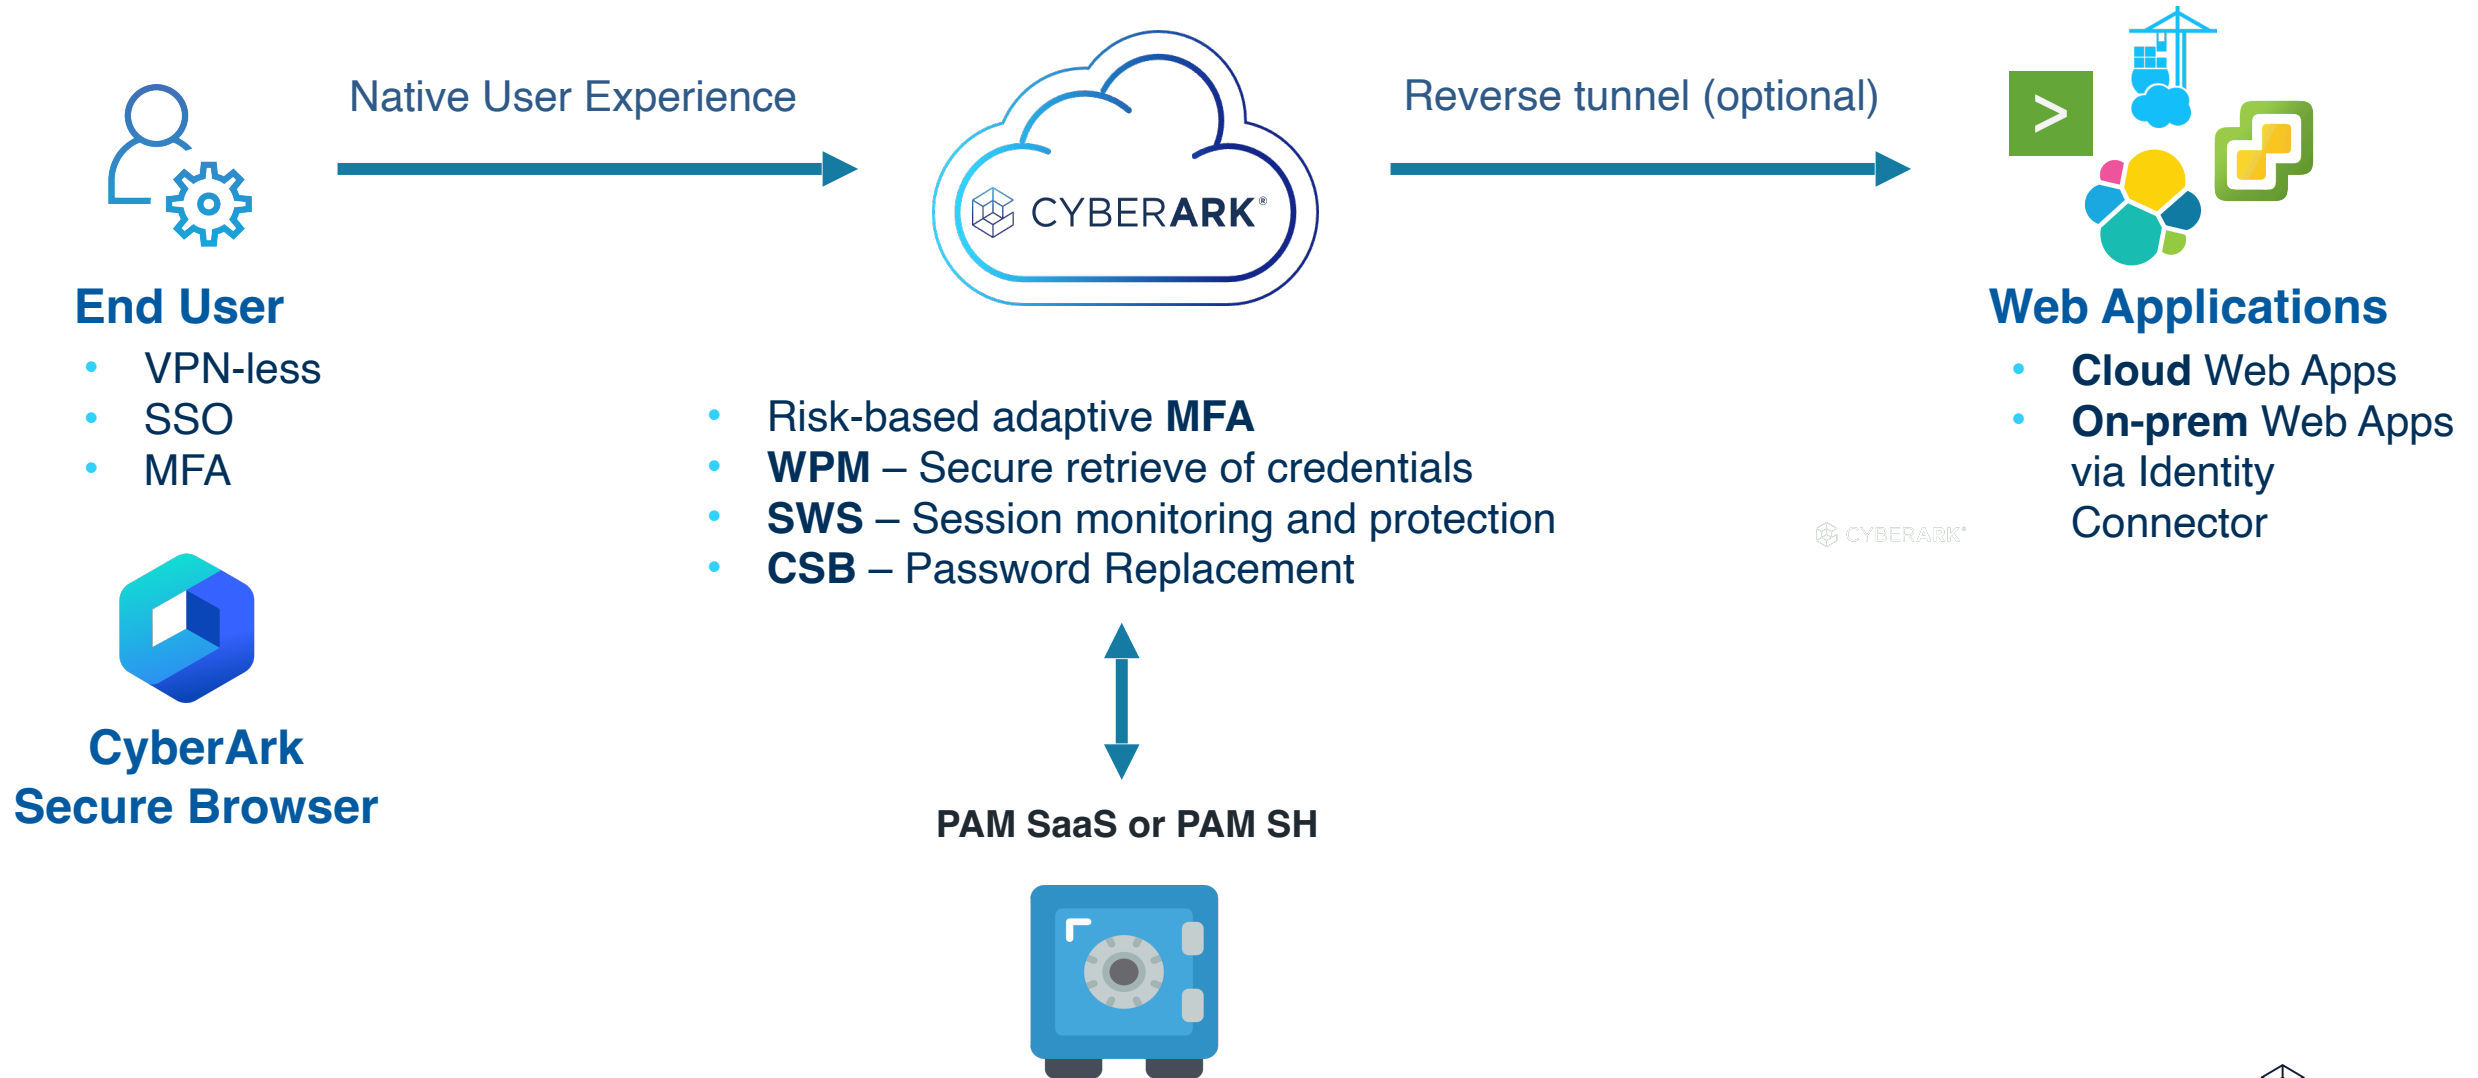

## APPLICATION EXAMPLES

Type	System
Application Servers	   
CI/CD Tools Chains	   
Container Platforms /PaaS	  
SDKs & Dev. Libraries	Go, Java, Ruby, Python .NET, C/C++, CLI, REST
Multiple Platforms	Windows, *nix, zOS, Cloud
RPA	   
Security Tools	  
Other Third Party Applications	C3 alliance partners solution with built in integrations

# Modern PAM - Secure Web Access

Workforce Password Management + Vaulted credentials = Secure Native Access to critical Web Apps

# Modern PAM - Secure Cloud Access

Secure, native access to cloud consoles and services with ZSP across multi-cloud environments.

Native User Experience

Escalates Privilege As Needed

## End User

- VPN-less
- SSO
- MFA

**CyberArk**  
**Secure Browser**

- **Cloud Visibility** – Onboard Workspaces & run Discovery
- **Flows** – Access Request Workflow
- **Secure Web Sessions** – Record User Session

## Cloud Management Consoles

- **Centralized Platform** across multi-cloud environments
- **Least Privilege** with on-demand escalation

# Rights control and just in time access

Measure and grow adoption with native UX; centrally audit all privileged sessions

## IT Users

WIN/\*NIX Admins

Database Admins

IT Ops

Help Desk

Cloud Operations

Security Ops

3rd Party Vendors

Cloud CLI or  
Console

RDP, SSH, DB,  
KubeCTL

RDP, SSH.  
CyberArk UI

## Zero Standing Privileges (ZSP)

Access policies created then  
deleted for each session

## Just-in-Time (JIT) Access

RBAC elevation to role, based on target  
system attributes

## Secure Standing Access

RBAC use of vaulted credential

## IT Targets

Data Center

OT System

Windows Infrastructure

\*NIX Infrastructure

Databases

Containers

Cloud Services

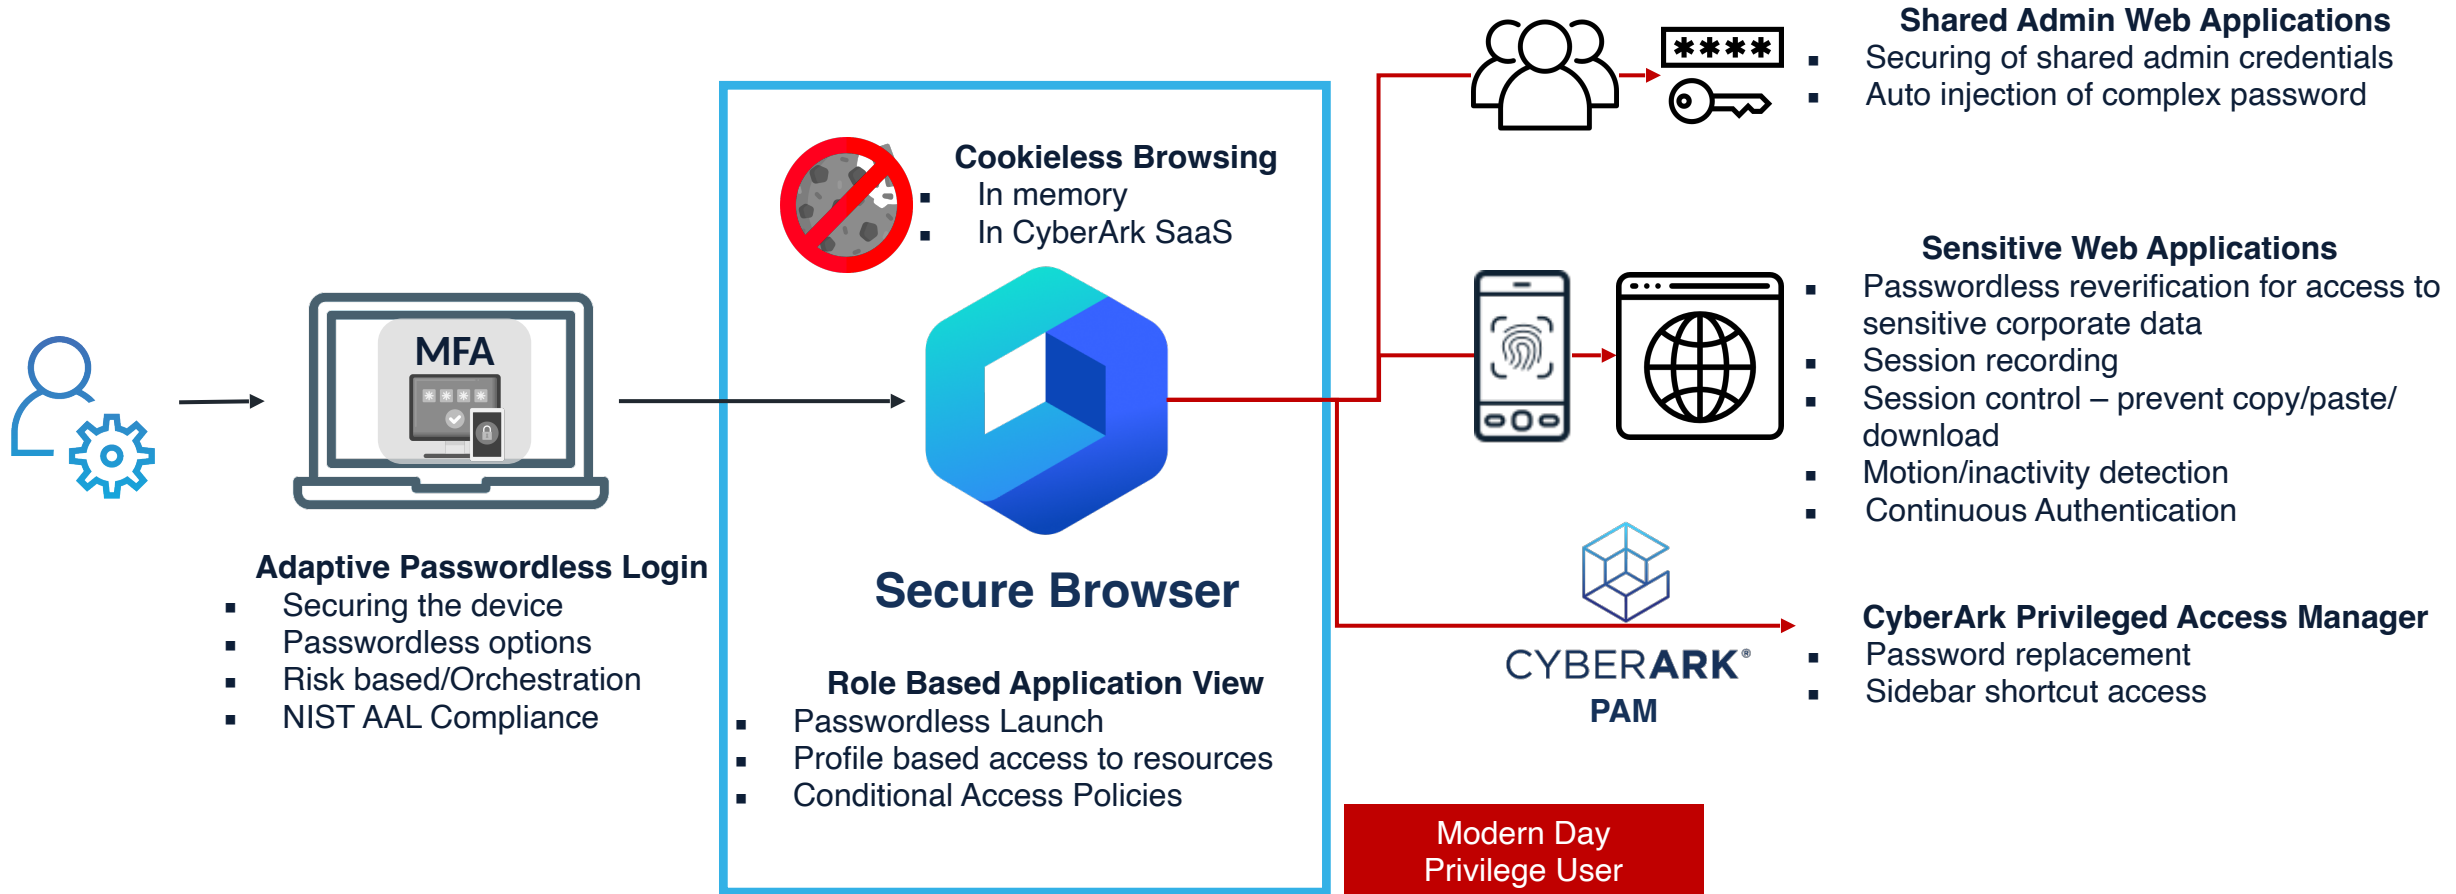

SaaS Apps

Request access through existing  
approval workflows.

Centralized audit logs /  
recordings with AI session  
summaries.

# CyberArk Secure Browser

Launchpad to everything enterprise

# Why CyberArk?

Leading Identity Security platform

## Best of all worlds in platform

- Best of breed for individual technologies:
  - PAM – ***Gartner Leader MQ PAM 6 times in row***
  - Secrets Management – *Gartner Leader*
  - Endpoint Privilege Management – *Gartner Leader for Windows*
  - Workforce User Management
- Single integrated platform
- Security first mindset
- Services of excellence

## Integrations

- Support out of box for 900+ platforms
- Customization of plugins
- Native access increase adoption - support of IT tooling (RDP managers, SSH clients, DB clients, Web browsers ..)
- Support for enterprise security and IT systems (SIEM, HSM, MFA, Authentication, ..)

## Full PAM security

- Credentials management and rotation
- Session Management and Recording
- Threat Analytics
- Just-in-time access
- Zero Standing Privileges
- Adaptive MFA and SSO
- Remote VPNless connection
- Secure Browser
- Endpoint Identity Protection
